Education

Instrumentation Engineering

2021 – NOW

Sepuluh Nopember Institute of Technology

As an instrumentation engineering student who learns many things about measurement, control, safety and calibration where this knowledge is implemented as a student by participating in competitions, PKM, community service, internships, and KKN. One of the competitions that I have participated in and relate to the position is, Indonesian Vocational Olympiad in the field of Website Design, which at that time became a finalist.

Software Engineering

2018 – 2021

SMK Negeri 1 Surabaya

As a student majoring in software engineering who studies programming languages, web development, desktop development, back end (database, server).

Pros

Do much, talk little.
Happy and fast learner
Loyal

Disadvantages

lose track of time if done something
People pleaser
